PGI Commercial Offers an EIFS Contractors Program

Morristown, NJ, January 23, 2007 - PGI Commercial (PGIC) announces the availability of an insurance program designed specifically for contractors that are certified to install Exterior Insulation and Finish Systems (EIFS).

The Commercial General Liability policy is offered on a claims-made basis and was created to fill a market void. Most traditional CGL policies written for contractors specifically exclude coverage for any completed operations involving EIFS application. This exclusion in coverage can leave contractors unknowingly exposed to a potentially significant liability.

The program is available on a nationwide basis with limits up to \$1,000,000 per occurrence, \$2,000,000 general aggregate. Coverage is provided by an A, XV rated market.

Dryvit Systems, Inc., a leading manufacturing of EIFS products, has endorsed the program as a viable solution to the problem of insurance availability. Tony Stall, Vice President of Dryvit, noted, "It's important to us that qualified contractors be able to obtain insurance coverage for the installation of our products. We are excited that PGIC is now able to fulfill this need."

Insurance producers interested in the EIFS program should contact Jill Bay at 714-333-1703. EIFS contractors should ask their independent insurance agent to contact PGI Commercial.

About PGI Commercial
